

DUEVOCE DUALX8 Subwoofer

Subwoofers that come free with sound bars are typically cheap and nasty with little power and poor bass extension. They give the impression of bass but often there is little deep bass and a lot of distortion. The DueVoce DualX8 subwoofer is different. There is real bass extension well below 40Hz and the built-in amplifier can power the subwoofer to high SPL levels of 107 dB with only 1% distortion. Adding the DueVoce subwoofer to your sound bar will transform or sound system.

A perfect partner for small desk-top or book-shelf speakers. Placed under a desk or hidden away in a corner, making your small speakers sound like the largest of floor-standing speakers.

Finally, if you are truly trying to keep your design space as clean and uncluttered as possible, you can install in-wall speakers and add this sub to create a 'hidden' sound system. Using our 2.1 amplifier to power the in-wall speakers and provide the signal for the subwoofer, the resulting system is almost invisible and yet sounds like a big system with amps and large speakers.

SPECIFICATIONS

- Active Dual 8" Subwoofer
- Class D
- Power: 130W RMS 300W Dynamic
- Active Woofer: 8" Front Firing
- Passive Woofer: 8" Down Firing
- Variable X-Over: 40Hz to 200Hz
- Frequency: 17-165 Hz
- Sensitivity: 86dB +/-2dB
- Phase: 0-180°
- Voltage: 100-120V AC / 220-240V AC
- Inputs: L&R / Low Level
- Finish: Gloss Black
- Dimensions: (WxHxD) 10.5 x 10.5 x 11.9in
- Weight: 17.19 lbs
- 2 Year Warranty
