In-Ceiling Speaker | Product Specification Sheet

ICE600TTWRS

6.5" Weather Resistant Stereo In Ceiling Speaker, 150W, Single

Dual Voice Coil, Dual 1" Tweeters, Left and Right Channels in One Speaker, for Bathrooms, Covered Patios and Small Rooms

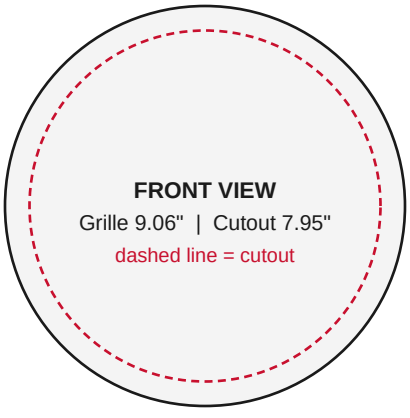

KEY FEATURES

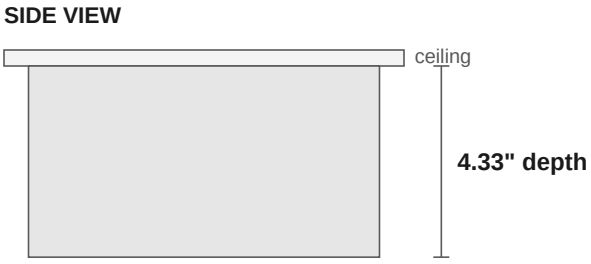

- **Check the fit:** Needs a 7.95 inch cutout and 4.33 inches of clearance above the ceiling; paintable grille is 9.06 inches across. Replacing speakers? Measure the old hole first. Dog ear clamps, no brackets needed. Sold as single stereo speaker
- **Stereo From One Speaker:** Dual voice coil design plays both left and right channels through a single 6.5 inch woofer, ideal for bathrooms, closets, hallways and small rooms that only have space for one speaker
- **Dual Tweeters:** Two 1 inch polycarbonate dome tweeters, one per channel, plus a polypropylene woofer deliver clear, full sound from 48Hz to 20kHz with 150 watts of power handling
- **Built for Moisture:** Santoprene surround resists heat, cold and humidity without hardening or cracking; rust-resistant aluminum grille handles bathrooms, laundry rooms, kitchens and covered patios
- **Simple Wiring:** Connect the left channel to one set of terminals and the right channel to the other; 89 dB sensitivity and 8 ohm impedance per channel work with most stereo amplifiers and receivers
