# ICE660

6.5" ANGLED LCR IN-CEILING SPEAKER

150W • 8Ω • 50Hz - 22kHz • 92 dB

**Ordering**

Model ICE660 • Sold as a single • Paintable grille • 10-year warranty

The OSD Audio ICE660 is a 6.5" angled LCR in-ceiling speaker for home theater. Its woofer is fixed at 15 degrees, so it mounts within about a foot of the wall and still aims sound at the listener.

### Angled for Better Imaging

The 6.5 inch woofer is fixed at a 15 degree angle so sound is aimed at the listener, not the floor, creating a realistic front stage from the ceiling.

### Place It Near the Wall

Mount within about a foot of the wall right above your TV, where standard ceiling speakers need about three feet of clearance; great for small or odd-shaped rooms.

### Flexible Home Theater Use

Works as left, center or right front speakers, as side or rear surrounds in 5.1 and 7.1 systems, or as overhead height speakers for immersive surround.

### High Output

92 dB sensitivity and 150W power handling with 8 ohm impedance work with most AV receivers; the 1 inch pivoting silk dome tweeter adds detail and focus from 50Hz to 22kHz.

### Check the Fit

Needs an 8.12" cutout and 5" of clearance above the ceiling; the paintable grille is 10.5" across. Dog ear clamps, no brackets needed.
