

FORZA 850T LUM Omni Speaker

The Forza-850T LUM is designed to illuminate pathways and borders and to provide 360-degree full bandwidth sound. Unlike solar powered lights and Bluetooth speakers, the Forza-850T LUM does not require replacement batteries nor will a wireless connection be lost. The LED light connects to a low-voltage transformer. The LED light requires 12 Volts and up to 10 Watts. The light color or temperature is 4000K, commonly called “Cool,” just above neutral. The maximum light output is 800 Lumens, similar to a 60-Watt incandescent lightbulb. The FORZA-850T LUM is a durable and weatherproof omni speaker that provides outstanding sound. Ideal for a variety of landscapes applications, delivering clear highs and mids with smooth, strong bass response.

SPECIFICATIONS

- Type: All weather In-ground 360 sound Omni speaker with built-in LED for landscape accent lighting.
- LED power: 8-10W
- LED input voltage: DC12V
- LED color temperature: 4000K
- Woofer: 8" with 360 horizontal dispersion
- Tweeter: 1" Mylar Whizzer Cone
- Frequency Response: 42 Hz - 20 kHz
- Power Handling: 200W
- 70V Tap: 20W, 40W, 60W
- Impedance: 8 Ohm
- Sensitivity: 88 dB
- Dimensions: (L x W x H) 14" x 14" x 17"
- Gross Shipping Weight: 14 lbs
- Warranty: 3 Year
